## **PRIVILEGES OF CONTRIBUTORS.**

Subscribers of a Guinea and upwards for more than one year are Governors as long as they maintain their subscriptions. Donors of ten guineas and upwards in one sum are Governors for life. Governors are entitled to send their own domestic servants for free treatment in the Hospital.

Firms, Clubs, and Hotels subscribing two guineas annually may send one of their employés for free treatment each year; four guineas, 2; and five guineas, 3 employés.

No Letters of Admission are issued. It will be sufficient for contributors to give their names to ensure the free treatment to which their servants or employés may be entitled.

Prompt Admission may be secured as follows:—A medical man should be asked to certify the disease the patient is suffering from, and this certificate should be sent to the Hospital, together with the name of a person who will undertake to see that the fee of £3 3s.\* (or £3 3s. a week, as the case may be) is paid. If the sufferer can be received, a Brougham-ambulance with attendants, including a nurse when necessary, will be sent to convey the patient to Hospital. There is a charge, according to distance, for horse hire for the ambulance, to be paid in addition to the fee, except in the case of Governors residing within a radius of five miles of the Hospital. These are entitled to free conveyance for their servants as well as free treatment.

If the ambulances of the Hospital cannot be spared for the journey to a distant suburb, information will generally be given as to where to apply for a conveyance locally.

N.B.—Disregard of these instructions frequently causes delay and annoyance.

\*Not required in cases where sufferers are entitled to free treatment.

# REPORT OF THE COMMITTEE

FOR THE

Year ended 31st December, 1900.

THE total number of patients under treatment during the year was 749, being 643 admitted during that period and 106 who were already in hospital when the year began. The total number is 49 in excess of that in 1899.

SCARLET FEVER.—There were 339 patients with scarlet fever admitted during the year ; there were at the beginning of the year 88 already under treatment, making a total of 427 cases : of these 351 were discharged cured, 73 were in the hospital at the close of the year, and 3 died. The mortality therefore was 0·8 per cent.

The cases admitted during the year were in number 109 less than in the previous twelve months, the diminution corresponding with a lessened prevalence of scarlet fever throughout the Metropolis as shown by the returns of the Registrar-General.

The mortality of 0·8 per cent. is the lowest in the records of the hospital, though in 1891 it was closely approached, being then 0·9 per cent.

The mortality at the London Fever Hospital from scarlet fever contrasts favourably—as it has done in previous years—with the mortality from the disease occurring in London generally, which was returned at 2·6 per cent.

The following table shows the incidence of and mortality from scarlet fever during the last ten years in London and in the London Fever Hospital :—

Year.	Number of Cases in London.	Deaths.	Percentage Mortality.	Percentage Mortality at the London Fever Hospital.
1891	11,398	589	5.1	0.9
1892	27,095	1174	4.4	1.9
1893	36,901	1587	4.3	2.3
1894	18,440	961	5.2	2.0
1895	19,757	829	4.2	2.6
1896	25,647	940	3.6	1.3
1897	22,848	780	3.4	1.7
1898	16,894	581	3.4	1.5
1899	18,089	398	2.1	1.4
1900	13,809	361	2.6	0.8

This table shows that though the prevalence of scarlet fever fluctuates considerably from year to year, yet on the whole there is a marked tendency to a gradual decrease in the number of persons attacked, and even a still more noticeable decrease in the number of deaths from the disease.

The greatly increased facilities for contracting and spreading the disease afforded by the aggregation of large numbers of children in the extensive Board Schools of London built during recent years, appears to be more than counterbalanced, as regards scarlet fever, by the benefits accruing from the Public Health (London) Act of 1891, providing for the immediate removal to hospital of persons attacked by infectious disease from dwellings or public institutions, where they would serve as foci for infecting other persons ; since the Act came into force the number of cases of scarlet fever in London has gradually diminished, notwithstanding its increased population ; moreover there is good evidence that the disease is also lessening in severity, the proportion of fatal cases among those who have actually contracted the disease having very markedly lessened.

The London Fever Hospital shares in the task of removing the sources of infection and in the providing of isolation and treatment for persons suffering from infectious diseases; unlike any of the other fever hospitals in the Metropolis it is unsupported by rates, and depends for support entirely upon donations and subscriptions and the payment by patients, which covers but a small proportion of the expense of the treatment. The London Fever Hospital again is the only fever hospital in London which receives cases of measles or German measles, and which provides accommodation for those who are willing to pay towards the expense of their illness.

MEASLES.—Twenty-five cases of measles were admitted during the year, and two were already in hospital at the commencement of the year: of the 27 cases which thus came under treatment, 25 were discharged cured and 2 remain in hospital. No deaths occurred from measles.

RUBEOLA.—The number of cases admitted was 164, being 131 more than in the previous twelve months: 161 were discharged cured, leaving 3 still in the Institution on December 31st, 1900.

DIPHTHERIA.—Ninety-one patients with diphtheria came into hospital, and 14 were in hospital when the year commenced: of these 105 patients, 87 left the hospital cured, 15 are still in hospital, and there were 3 deaths—a mortality of 3·3 per cent., as compared with the mortality in London generally of 12·8 per cent.

DISEASES OTHER THAN INFECTIOUS FEVERS.—Twenty-four patients were sent into the hospital with certificates of infectious disease from which they did not suffer; all these, with two who were in hospital at the beginning of the year, were discharged well.

Of the Officials of the Institution—one ward sister, one nurse, and one domestic servant contracted scarlet fever; one nurse had measles and one German measles; two nurses and five domestic servants contracted mild attacks of diphtheria; this occurrence, together with some septic conditions among the patients with scarlet fever, led to an examination of the drains, which disclosed defects which are now remedied.

The large scarlet fever wards were closed during a short part of the year for re-flooring, which had become absolutely necessary, and for fitting with the electric light.

As was stated in the report of last year the Committee of Visitors of H.R.H. the Prince of Wales' Fund reported that the older parts of the hospital were in an unsatisfactory condition, and required reconstruction: the Committee are anxious to carry this out, it being part of the scheme some time ago adopted for gradual rebuilding of the hospital, but the funds at command do not enable them to undertake this work at present, and they were compelled to re-roof and re-fit the wing at a considerable outlay, for the reception of cases of measles and German measles, and these wards became absolutely necessary during a part of the year for receiving these cases.

As is usual, the great number of cases received into the Institution were cases of scarlet fever, but there is an increasing demand for admission of diphtheria cases, which has taxed the ward accommodation for that disease to the utmost, and additional beds for the reception of diphtheria cases are much required.

The annual subscriptions received during the year 1900 were £4,659, and the donations £1,932, being £113 and £345 respectively more than the amounts received in the previous year.

A grant of £500 was received from the Prince of Wales' Fund.

Father Dolan, who had been for many years a member of the Committee, and had for many years visited the Roman Catholic patients, died in June, 1900.

The tables annexed to this Report were drawn up by Dr. Hopwood, the resident medical officer.

# LONDON FEVER HOSPITAL,

*LIVERPOOL ROAD, ISLINGTON.*

---

## LAWS AND REGULATIONS.

---

### Reception of Patients.

1. The Hospital is intended for the reception of persons suffering from infectious fever other than small-pox, and more especially for such of those persons as may require isolation, in order to prevent the further spread or propagation of the disease from them to others.

2. Any person (not being a parochial pauper) labouring under such disease shall, subject to the next rule, be considered a proper person for admission into the Hospital.

3. The Committee may from time to time make regulations for the admission of such persons as patients on payment of such sums as may be from time to time determined, provided always that—

(a) Domestic servants of governors shall be admitted gratuitously.

(b) The Committee may, if they think fit, at any time reduce or wholly remit the fees in the case of individual patients.

4. Applications for admission should be accompanied by a medical certificate stating the nature of the disease. The medical officers may, in the exercise of their discretion, refuse admission to any case which they deem unfit; but every refusal to admit a patient shall be reported at the next meeting of the Committee, together with the reason for the refusal.

### Governors.

5. All subscribers of not less than one guinea per annum, who have subscribed for more than one year, and all donors of not less than ten guineas in one donation, shall be governors of the Hospital. This rule shall not be retrospective.

### General Meeting and Election of Committee.

6. A general meeting of the governors, of which ten days' previous notice must be given in three morning newspapers, shall be held every year, on the second Friday in February, or as near thereto as may be convenient, for the purpose of approving or rescinding the proceedings of the Committee for the preceding year; for receiving the annual report of the state of the funds; and for electing a president, vice-presidents, treasurer, honorary secretary, and other members of the Committee for the ensuing year.

7. The Committee for the management of the Hospital shall consist of the president, the vice-presidents, the trustees, the treasurer, honorary secretary, and not less than fifteen nor more than twenty-five other governors.

8. A special general meeting of the governors may at any time be called by direction of the president or of the Committee; or on the requisition of any twelve governors, provided the requisition be made in writing to the secretary, and the purpose for which the same is summoned be published in three morning newspapers at least ten days prior to the meeting; but the proceedings of such special general meeting, though acted upon *pro tempore*, shall not be deemed final until confirmed by another general meeting.

9. No new rule or law shall be made, nor shall any existing rule or law be repealed or altered, until determined upon at a general meeting by a majority of governors present and voting, and until confirmed at a subsequent general or special meeting.

10. The presence of seven governors shall be necessary to constitute a quorum at general meetings, and without that number no business shall be transacted.

### The Committee.

11. The Committee shall manage the Hospital. They shall meet on the second Friday, or on such other day of every month as they may appoint; and three members shall be necessary to constitute a meeting and to transact business. A special meeting of the Committee may be called by the direction of the honorary secretary, or by any three members of the Committee, on giving at least three days' notice of the same to the members of the Committee, and specifying the business for which it is called.

12. The Committee shall have authority to appoint sub-committees, whose reports shall be submitted to their consideration; and with the assistance of the medical officers shall, from time to time as may be expedient, form regulations and by-laws for the internal management of the Hospital.

13. The resolutions of one meeting of the Committee shall not be rescinded by another, unless it be specially summoned for that purpose.

14. The Committee shall yearly publish a report of the state of the Hospital.

15. All accounts, except such small sums as may be comprised under the item of petty cash, shall be submitted to the Committee at the monthly meetings, after having been duly examined by the secretary, the resident medical officer, the house-directors, and certified by the auditor; and such accounts, if approved, shall be paid by cheques payable to order, signed in Committee by two members of the Committee, or, in case a Committee cannot be formed, by two of the house-directors, and in all cases countersigned by the secretary.

16. No member of the Committee shall furnish, otherwise than gratuitously, any goods, provisions, or other articles, for the use of, or on account of, the Hospital, or be concerned in any contract, directly or indirectly, for supplying the same, or be employed for hire, fees, wages, or profit in any office or employment in connection with the Hospital.

### Conduct of Meetings.

17. At all meetings a simple majority of the members present and voting shall bind the minority; and in case of equality of votes, the chairman shall have an additional or casting vote.

### Treasurer.

18. The treasurer, if present, shall take the chair at all meetings of the Committee, in the absence of the president or vice-presidents. He shall keep an account at the bankers', and all moneys received for the use of the Hospital shall be paid to such account; he shall honour cheques signed, as provided in Rule 15.

### Honorary Secretary.

19. In the absence of the Committee, the honorary secretary shall represent the Hospital with the public and with public bodies, reporting his action to the Committee.

### Audit.

20. All accounts of the Hospital shall be audited by a professional auditor. The auditor shall certify the accounts, and it shall be his duty to report to the Committee anything in the books or accounts which in his opinion appear to call for comment.

21. At the meeting of the Committee in November, three gentlemen, one at least of whom shall not be a member of the Committee, shall be appointed to examine the accounts of the Hospital for the current year, and approve an abstract of all receipts and disbursements to be prepared by the secretary, and laid before the annual general meeting in February.

### House-Directors.

22. The house-directors shall consist of the trustees, treasurer, the two physicians and the architect, who shall be *ex-officio* house-directors, and of three elected house directors chosen as follows:—The Committee at their meeting in February shall

appoint a member of their own body to be chairman of house-directors, who shall retain office for a term of three months. They shall in like manner appoint a chairman of house-directors at their meetings in May, August, and November. The same person shall not, unless by special resolution of the Committee, be elected for two terms in succession. The Committee at each monthly meeting shall appoint two members of their body to be house-directors for the ensuing month, one of whom, if possible, shall not have served during the previous month. If the same house-directors are re-appointed, they shall only be so appointed by special resolution.

23. They shall from time to time cause the beds, clothes, and apparel belonging to the Hospital to be examined, and shall report thereon, if necessary, to the Committee. They shall inspect the tradesmen's bills, and take care that the provisions, bedding, clothing, furniture, and every article for the use of the Hospital be supplied on the most reasonable terms; they shall order in writing all permanent stores, and shall advise the Committee as to all larger requirements and structural alterations.

24. All articles required in large quantity shall, where practicable, be supplied by contract after public tender, and all considerable contracts for work or repairs be made after public tender or invitation to not less than three respectable firms, but the house-directors shall not be obliged to accept the lowest or any tender.

25. They shall be authorised in all respects to enforce the observance of the regulations of the Hospital; they shall notice and report to the Committee any irregularity or misconduct on the part of the officers, servants, or patients of the charity, and shall, at every meeting of the Committee, cause a statement of the house expenditure to be produced for the preceding month. They shall appoint and dismiss, or approve the appointment or dismissal, of all nurses, porters, and other servants, male or female.

26. The chairman of the house-directors shall, during the intervals between their meetings, be authorised to exercise the functions of the house-directors in any matter of urgency, reporting, at their next meeting, what he may have done under this authority.

### Physicians.

27. There shall be two physicians and one or more assistant physicians, who shall be Fellows or Members of the Royal College of Physicians of London; and also a surgeon, who shall be a Fellow of the Royal College of Surgeons.

28. One of the physicians shall visit the Hospital at least once every day. The physicians shall have the power of dismissing any patient for refractory conduct or disobedience of orders. The physicians, assistant physicians, and surgeon shall be entitled to attend all Committee meetings.

28A. No physician shall hold the appointment of physician for more than twenty years, nor after he shall have attained the age of sixty-five years.

### Assistant Physicians.

29. In case of the illness or necessary absence of either of the physicians, one of the assistant physicians shall attend regularly in his stead. Such attendance<sup>s</sup>

shall be reported to the Committee. If the number of patients exceed 150 an assistant physician shall come on active duty.

30. The surgeon shall undertake the surgical charge of such patients as the physicians may deem necessary, and in case of emergency shall attend when summoned by the resident medical officer. Such attendances shall be reported to the Committee. If unable to attend, the surgeon shall substitute a duly qualified deputy.

### **Hospital Pupils.**

31. No medical student shall be permitted to visit the Hospital unless in company with one of the physicians, or unless regularly entered or registered as a pupil by the physicians.

### **Architect.**

32. There shall be an Architect to the Hospital. He shall advise on all questions concerning the Hospital sites and buildings, and shall supervise the structural maintenance of the Hospital, prepare all plans, and superintend all works connected therewith.

33. His status shall be similar to that of the physicians to the Hospital.

### **Resident Medical Officer.**

34. The resident medical officer shall reside constantly at the Hospital, and shall devote himself entirely to the duties of his office, as defined by these laws and by the by-laws. Candidates for the post shall be required to produce satisfactory testimonials to the Committee.

35. He shall superintend the wards and Hospital generally, between the visits of the physicians, and the dispensary shall be exclusively under his control. In the absence of the Committee and house-directors, he shall be recognised as the head of the establishment.

36. He shall keep accurate registers of the patients and of their cases, which registers shall be the property of the Hospital; he shall produce a special report every month, to be laid before the Committee.

37. When the number of patients shall be sufficiently great, or other circumstances render such a step necessary, the Committee shall have power to appoint one or two assistants to the resident medical officer, and he or they shall receive such remuneration as the Committee shall from time to time determine.

### **Secretary, House Steward, and Collector.**

38. There shall be a secretary and a house steward. These offices shall be filled by the same or by different persons as the Committee shall from time to time think fit.

39. The duties of the secretary shall be to have the conduct of the correspondence of the Hospital, the keeping of the accounts, and to perform all duties appointed by the by-laws.

40. The house steward shall have the management of the domestic affairs of the Hospital, under the general superintendence of the resident medical officer, and shall perform the duties appointed by the by-laws.

41. The duties of the collector shall be—

To call on subscribers and collect all donations and subscriptions of the Hospital; to give only authorised printed receipts for the same; to attend all meetings when required; to keep correct lists and duplicate lists of all donations and subscriptions, with the residences of the donors and subscribers, made up from day to day; to pay weekly all moneys he may receive to the bankers; to deliver weekly to the secretary reports in writing of all moneys received and paid, with the balance at the bankers'; to keep the accounts regularly entered in the collector's cash book; to deliver a copy of the annual report to each subscriber; and to perform all the duties appointed by the by-laws.

42. The secretary, house steward, and collector shall be required to enter into bonds with sufficient sureties for the due and faithful performance of their duties in such sums as the Committee may determine.

### **Matron.**

43. The matron shall have the direction of the nurses and female servants of the Hospital, subject to the superintendence of the house directors and the resident medical officer, and shall be responsible for the care and order of the wards. She shall have charge of the housekeeping arrangements, and shall perform the duties appointed by the by-laws.

### **Election of Officers.**

44. The physicians, surgeon, assistant physicians, architect, resident medical officers, matron, auditor, and secretary shall be elected by a Committee comprised of the Committee for the management of the Hospital, the honorary medical officers, and the architect.

### **Salaries.**

45. No variation in the fixed salaries of officials shall be made unless the Committee be summoned for that purpose, and unless the proposed addition or diminution be confirmed by a subsequent Committee.

### **Trustees.**

46. The legal estate in the lands, buildings, and premises of the Hospital shall be vested in not less than three trustees, new trustees being appointed at a general meeting of the governors when vacancies occur.

47. All legacies of £100 and upwards, unless otherwise directed by the testators, shall be invested for the benefit of the Hospital, in the names of three trustees, to be called trustees of the fund.

### Religious Ministrations.

48. Ministers of religion of all denominations shall have free and equal access to the Hospital, but no minister of any denomination shall receive any payment out of the funds of the Hospital in respect of his ministrations.

49. It shall be a standing instruction to the Committee and officers of the Hospital that any minister of religion desirous of visiting or ministering to patients of his own denomination shall be received with all courtesy, and shall be afforded all facilities consistent with the wishes and welfare of the patients, and the convenient conduct of the Hospital.

### By-Laws.

50. The by-laws which shall from time to time be made by the Committee shall be open to the inspection of any governor, and shall contain, among other things, a full specification of the duties of the resident medical officer, the matron, and other officers and servants of the Hospital, together with the terms of their employment. This specification of his or her own duties shall be read to, and assented to in writing by, every person before his or her appointment, and referred to on all occasions of doubt.

---

At a Meeting of the Committee held at Freemasons' Tavern, on October 13th, 1882, it was resolved:—

1. That no election to the offices of physician, assistant physician, resident medical officer, assistant resident medical officer, secretary, auditor, or matron, be proceeded with until the vacancy has been advertised in three daily London papers and in two medical journals. The first advertisement to be inserted not less than eight days before the election.
-

## LORD BALFOUR OF BURLEIGH

## PRESIDING.

THE CHAIRMAN said: Gentlemen, it now falls to my lot to add a few remarks to what has already been said by Dr. Sidney Phillips and Dr. Cayley as regards the work of the Hospital for the past year. You will have gathered from the figures submitted by Dr. Phillips that this has not been a year of great pressure, but on the other hand like last year it has been one of quiet and usual work, and we may, I think, congratulate ourselves that it has not been a time of pressure because previous to the year 1897 we had one or two very severe years indeed. But it must be remembered that it is just as necessary to keep up a Hospital of this kind in a state of full efficiency if it may not be crowded with patients, as if every year there was an increase in infectious fevers going on in the Metropolitan, because we never know when there may not be so outbreak, and as I have repeatedly pointed out, you cannot get up the organisation and nursing staff of a Hospital of this size after it has got all our preparations as it is to be ready again at the time when its work may be required. (Hear, hear.)—During the past year we have admitted 189 cases from governors, and these came mainly from subscribing private families, business houses, and from clubs and hotels. In 11 cases fees were remitted or reduced on account of inability to pay, and in each case after careful inquiry by the house directors. You will have seen by an easy calculation that the 176 patients treated were about 60 a day, because they remained about 37 days on an average each, so that taking one day with another we had an average of about 60 patients in the Hospital throughout the year. Of those, 23 were in private rooms, and they paid, of course, the full charge for their treatment. With regard to the others, it may be worth while to add a little to the information which Dr. Phillips has given us in the report. He mentions that there were 54 cases received from other hospitals: 44 of them were nurses in other hospitals, nine were patients and one was an official, but in addition to those I think it is rather useful to analyse the classes to which the other patients who were admitted belonged.

Well, I find that during the past year 71 were domestic servants, 33 were from families or the employes of tradesmen; 18 were from schools and 15 were from clubs or hotels. I mention this as showing the importance of the work of the Hospital, because every one of these classes are people who are specially brought into contact with others, and who, without such a Hospital as this, would be in a very helpless condition when taken by infectious fevers. In addition there were 46 cases described as professional people. The Institution, therefore, is doing a really useful work as a defence of the general population against the spread of infectious fevers. We have been able for the first time for some years to say we have not had to refuse to admit any patient suffering from scarlet fever or from ordinary and German measles. There is another point in Dr. Phillips' report I wish to emphasise. He says that now about 75 per cent. of all infectious cases are treated in hospitals, and he says that that proportion is gradually increasing. I think that is a very satisfactory state of affairs, because I believe we stand a very much better chance of preventing infection if a case is treated in a hospital than if it be treated in the great majority of private houses. (Hear, hear.)

Some of us, of course, are fortunate enough to have private houses where successful isolation is no very great difficulty, but in the great

majority of private houses, where there is no proper means for isolation, there must be much greater risk of the fever spreading than in the case where the patients are moved to a hospital. One cannot help sympathising with those who have a reluctance to send, perhaps, young children away to a hospital—one may easily understand that the mother especially might be very anxious with regard to adopting such a course, and therefore I think it is very important to emphasise the fact that our treatment in the Hospital is so successful that the death-rate has been reduced to a very small point indeed—1·5% (Hear, hear.) I should also wish to make it clear that every precaution is taken to give the fullest information to the near relatives of our patients as to how their friends are going on. They can visit them twice a week under proper precautions, and they can, if they choose, have daily ballads on a half penny per ballad. I think, taking all these things into consideration, it is not surprising to say that it would be not only for the advantage of the patients themselves but the benefit from which they derive, but also a safeguard to the general public if more use were made of our Hospital amongst the classes who at present do not use a hospital, but who treat their infectious cases at home, and anything which we can do to emphasise the difference between our Hospital and the Metropolitan Asylums Board Hospital should help in that way. Those who come to us can if they choose, pay the whole of the cost of their treatment, and in most cases, even if they do not pay the whole cost, they can usually recoup the Institution for their maintenance, and will not be, as so many persons seem constantly to think, receiving the help of the rates. I am told that mistakes constantly arise on this point, and that people go to the offices of the Metropolitan Asylums Board to find out when patients who have been admitted into our Hospital will be discharged.

There is one other matter I would refer to. We have during the year had a large number of very grateful letters from patients setting forth their satisfaction at the treatment they received, and I could sometimes wish that their gratitude took a more tangible form, because undoubtedly beyond all question we do in some cases—I should be very sorry to say in all or even in the majority—but I have not the slightest doubt that in some cases the Hospital does incur expense on behalf of people who can perfectly well pay, if we can only touch their consciences to induce them to do so. It is not very easy for us to discriminate between one and the other, but there is no doubt that from time to time there are many who take advantage of the Hospital treatment who could quite well pay a larger proportion of their cost than they do. As to our finances, our funds upon the whole are satisfactory. Mr. Flamer has told you we have had to sell out £1,100 stock, but our annual subscriptions and donations show an increase, and, therefore, I don't wish in any way to give the impression that we are in a state of poverty. I hope, however, that that will not be taken as a reason for anybody diminishing their contributions; because if we do pay our way, we can only just pay our way, and there are many things that we should like to do in the way of improvement if we had the means. The only other matter which I think it necessary to advert to is that we have this year only received from the Hospital Saturday Fund the sum of £25, and we may reasonably, I think, hope that that amount will be increased next year. I now, gentlemen, beg to move a vote of thanks to the committee for their services during the past year, and approval of their proceedings. (Applause.)

# London Fever Hospital.

LIVERPOOL ROAD, N.

## CHAIRMAN'S ADDRESS

AT THE

Annual Meeting, held at the Hotel Victoria, Northumberland Avenue, on  
Friday, 15th February, 1901.

## LORD BALFOUR OF BURLEIGH, Presiding.

THE CHAIRMAN, Gentlemen, it now falls to me to say a few words upon the general aspects of the year that has just passed, to move the approval of the proceedings of the Committee, and a vote of thanks to them; but before doing that, with the assent of my colleagues on the Committee, I wish to remind the Governors here assembled that our King Edward VII. has been for very nearly forty years patron of this Hospital as the Prince of Wales. I think, having regard to the long connection between us and the King, we, as a corporate body, should not meet to-day without passing a resolution expressive of our sympathy and condolence with him in the great loss which he has sustained in common with the whole nation in the removal from amongst us of the Queen. I hope and believe that we may be able to console His Majesty as our patron, but of course before we are entitled to do that, and to print his name as patron, we must ask for permission. What I am instructed to do, and I shall do it through the proper channel. In the meantime, I am sure that before I make any remark about the work of the Hospital, you will agree with me, and that we shall unanimously and cordially pass this resolution of condolence, and that it be transmitted through the proper channel to the King. The resolution was carried in substance.

### THE WORK OF THE HOSPITAL.

CONTINUING, LORD BALFOUR SAID: With regard, gentlemen, to the work inside the Hospital during the past year, I am glad to know that I have much to say before what has been so well said by Mr. Phillips' report, and so well emphasised by Sir Thomas Barlow. They have not, I think, mentioned that 100 of our patients were treated free of charge as employees or servants of governors, and this is the highest number that has ever been treated in any one year for governors and subscribers. I hope the governors, many of whom are here to-day, will recognise that they are receiving as a body great benefits from their contributions to the Institution.

### THE HOSPITAL A LOSER BY THE PRINCE'S FUND.

Turning to the question of finance, we have a slight increase of £110 in our annual subscriptions, and a small increase in the donations of £450. I am glad to think that our subscriptions have kept up so well. Last year I referred to the fact that we were suffering by the withdrawal of annual subscriptions which have been allotted to the Prince of Wales's fund. I went into the question at some length last year, and I don't wish to go into it again, but you will remember that I suggested that we should communicate the facts that had come to our notice to the managers of the Prince's Fund, and tell them that they were drawing away

some of our subscriptions, and that both on that and another ground, to which I shall allude directly, we had a case for a larger grant from that Fund. The managers of the Prince's Fund have acknowledged that in some cases subscriptions have been withdrawn from our list and transferred to them; and as we do not benefit by an annual subscription from the Prince's Fund, any subscription which is withdrawn from us and given to the Prince's Fund is, of course, a dead loss to us. We were also, as Sir Thomas Barlow mentioned, criticised by the Fund for the inadequate condition in which some of our buildings were found. We said at the time we are most anxious to reconstruct these buildings. We are doing so, and we would go on if we could; but unless we get more money for that purpose we cannot do it. £2,000 of our invested money has had to be realised this year for certain extra expenditure in reflooring a ward in one case, and the fitting up of a wing for measles in the other case; so that, as far as our invested funds are concerned, we are £2,000 poorer than we were at this time last year. The Prince's Fund have listened to our plea to the extent of giving us £300 more than last year—we having received £500 this year as against £200; but even if we look at that as charitably

turn his attention, or which would confer a greater benefit upon the community of London, than to put us in a position of finishing the reconstruction of our Hospital which we have begun, and to enable us to add to our resources that Convalescent Home for which we have purchased a site, and which we have talked of for so many years. If this were done, it would be like quadrupling the lines of a railway, because we could then take in more patients, pass them more rapidly through our wards, and send them on to the Convalescent Home. This would do a great deal of good to the patients and to the Hospital, and enable us to render still better service to the community of London. I hope that if my remarks are read by somebody with a sufficiency of this world's goods to be able to give away some of his surplus income he will turn his attention to the need of reconstruction of the London Fever Hospital. We don't ask for donations for an infinity of years. If we had £15,000 or £20,000 I think we could make a very great advance indeed; and if we could get that money to spend in the next two or three years we could make a very great improvement in the Hospital. I see that since the year 1892 we have treated some 90,000 cases. There is no doubt that the good work

Chairman's Address at the Annual Meeting, held at the Hotel Victoria,  
Northumberland Avenue, on Friday, 11th February, 1893.

## LORD BALFOUR OF BURLEIGH, PRESIDING.

THE CHAIRMAN: Gentlemen, I understand that it now devolves upon me to propose the next motion, and to say a few words about the work of the Hospital during the past year. It has been a quiet and uneventful one in the working of the Institution, and we have nothing very special to lay before this meeting. As Dr. Phillips's report tells you, there have been 707 patients in the Hospital, and 153 for whom we could not find accommodation, and who for that reason have been regretfully refused. The significance of that fact lies in this, that 100 out of that 153 were refused in the months of October and November alone, so that you will see the necessity for increased accommodation is really very much more pressing than the actual figures, without that explanation, would show. We are doing our best to get increased accommodation, and it is to provide increased accommodation upon the newest possible principles that we make a somewhat urgent appeal for additional funds. There is another point which the figures of this year serve to bring home to anyone who looks a little below the surface. I have over and over again pointed out how necessary it is for us to be always ready for an emergency. You take 100 patients, and you are told they stayed in the Hospital an average of 45 days each. If that is calculated up you would find that that would give you an average of 70 patients a day in the Hospital, and if you could to regulate your fevers as to get the average spread over the year we could very comfortably run along and accommodate that number each day, but, unfortunately, that is not how these things are regulated, and therefore that average of 70 a day does not represent either the pressure upon the staff or the difficulties which the Committee have to contend with. I find from a little more careful calculation that the number of patients has fluctuated from 40 to 140, and you don't know how quickly it may go from the one figure to the other, and therefore you must be prepared to act upon the supposition that you may have three or four times 40 patients after a very short interval. When we have not had many patients it sometimes looks as if the cost of their treatment was higher than that of some other hospitals, but then we always have to maintain our fixed staff and other arrangements to be prepared for emergencies. Averages are no guide to us; we must be prepared for the maximum.

During the year we have got new subscriptions to the amount of £377, and that is very largely owing to the care with which our Secretary looks after that department; but we have lost £295 for various reasons, so that the net gain is only £82. I am not going to make a complaint of that, for I think we have done wonderfully well considering the Indian Famine Fund, and the Jubilee and other outlets for money which have been brought before the British public in the last twelve months. As Dr. Phillips told you, we have lost donations to the amount of £753, but we have received a special donation of £875 from the Prince of Wales's Fund. Well, that is all very well for this year, but we have received a very direct hint that we are not to count upon that for the future, and I am very much afraid unless our friends come forward again that the result of this will be that in the coming year we shall find ourselves short of donations, and therefore I cordially second the appeal which Mr. Hamer made for our friends to come forward and assist us.

I don't like to lay much stress upon getting money in from legacies—it is to me very mixed satisfaction indeed. I very much prefer gifts to

legacies. I need hardly say that a person who gives a gift may, we hope, live a good many years after, but a legacy marks the conclusion of a person's connection with the Hospital. But there is another reason; legacies are subject very often to a somewhat serious drawback for the public funds, and that is another reason why gifts are so much better. Then I may further point out a very strong reason for giving gifts quickly. Life is uncertain; but if a gift is given to us of any amount and the donor dies within a year of the gift being given, it is still liable to legacy duty. Don't let me suggest that anybody to whom we appeal is likely to have that fate, but at the same time I would take leave to point out that the sooner persons give us money, the less likely are they to die within a year of their gift.

During the past year we have taken 95 patients upon governors' orders and from subscribing firms, clubs, and hotels—many of them at a time when no other beds in London were available. In times of great epidemics of fever the Metropolitan Asylums Board hospitals are full, and except for our Hospital for the privileges which are given to governors, these persons could not have got their servants attended to except in private houses. In addition to that we have a great claim upon the general public who are and take an interest in all the hospitals in this respect. Last during the past year we have treated 37 nurses who contracted one fever or another in other hospitals or in private families, and if it had not been for that assistance they would have had to be treated in their own homes, because obviously the hospitals to which they are attached could not attend them on the premises. The Hospital Saturday Fund only gives us £25, which I venture to suggest to them is a small sum considering that some 360 of our last year's patients came from the families of small tradesmen and clerks, many of whom are or ought to be supporters of the Saturday Fund. We keep these persons 45 days and charge them one-fourth of what they cost us, leaving three-fourths to be begged by our Secretary. We shall append this year to the report a tabular statement setting forth the profession and occupation in life from which our patients are drawn. There are 54 from professions, 37 nurses, 47 domestic servants, 186 employers and clerks, 176 tradesmen and their families, six from schools, five from other hospitals, 13 from various charitable societies, and policemen, soldiers, sailors, &c., a small number.

There is only one other matter I wish to mention, and that is that this year we shall lose from among the committee one gentleman who has been for many years connected with us. At the committee meeting which has just concluded we have had, with very great regret, to accept the resignation of General Finch. He has left London on account of his health, and resigns his membership of the committee. General Finch was elected in 1889, and during those nine years he has done much good and regular work for the Hospital, and especially as a member of the house directorate. It is interesting to notice that General Finch's father was also a member of the committee, so his connection with us is hereditary. We are very sorry to lose him, and I am sure the governors will feel that they have lost a very valuable official in his departure. I have now pleasure in moving approval of the proceedings of the committee during the year, and that that vote of thanks be rendered them for their services.

# London Fever Hospital, Liverpool Road, 12.

Chairman's Address at the Annual Meeting, held at the Hotel Victoria,

Northumberland Avenue, on Friday, 16th February, 1900.

## LORD BALFOUR OF BURLEIGH, Presiding.

The Chairman, who was received with applause, said: It now falls to me to make a few remarks from a more general point of view in regard to the work of the Hospital for the past year. It has not been a year of great pressure, but there have been more patients in the Hospital during the year 1899 than in 1898. During 1899 we have treated 700 patients; 107 of these were free by Government's order, 437 paid the ordinary charges, and 156 were treated at a reduced fee; 47 were treated in private rooms, and 107, of course, paid particularly for the use of the private rooms. The Hospital received 2,000 patients during the year 1899. The day average number of patients was 75, a considerably higher number than last year; and the duration of each case has, on an average, been longer during 1899 than it was in 1898. So that for each case the drain upon the funds of the Hospital was more serious. That arises not from any extra expenditure or extravagance on the part of the Committee, but on account of the special diseases which were most prevalent last year. In 1898 a large number of the cases were measles; in 1899 a much larger proportion of them were scarlet fever and diphtheria; and as the duration of a scarlet fever case is longer than that of a case of measles, the average daily sojourn of each patient during 1899 was longer than in 1898. It may be interesting to know that since 1802, when the Hospital was founded, nearly 90,000 cases have passed through it, a large proportion of them being sufferers from scarlet fever and diphtheria. I don't think I need go at length into the question of our having had to refuse patients, to which the chairman of the Finance Committee invited me to enter, because it has been dealt with in the Medical Report; but perhaps I should explain that by far the larger proportion of refusals were cases of typhoid fever, and it is right that patients suffering from that particular disease should be refused first if there is pressure upon our accommodation, because, unlike cases of scarlet fever and diphtheria, they can, to some extent, be treated in the wards of a general hospital. Scarlet fever and diphtheria, of course, are diseases of a nature which renders that impossible. There have, however, been some refusals of scarlet fever and diphtheria, mostly of cases which came from outside the Metropolitan area. It is very undesirable that we should have to refuse these cases, and we would not do it if we had room; and it is especially unfortunate to have to refuse such cases, because it is just at the time when it would be most desirable that we should be able to take them in—when there is a threat of an epidemic of either of these

two diseases. The annual subscriptions for last year show a small increase of £65—not a subject for a very great amount of congratulation; but still, in these bad times, I think that we ought to be thankful that our annual subscriptions have not diminished. (Hear, hear.) I think we must regard that fact as an eminently satisfactory proof of the confidence of the public in the management of the Institution, and I think I may also say of the zeal and care with which our annual subscribers are looked up by our Secretary and his staff. (Hear, hear.) I am sorry I cannot give quite such a favourable account of the contributions. Donations have fallen off by £725 as compared with 1898, and that is a matter that has been engaging the very earnest attention of the Committee, because it is upon the money we receive from this source that we should naturally look to enable us to reconstruct the Hospital as mentioned by Dr. Phillips, and to build the Convalescent Home which we have talked about for so many years.

### THE EFFECT OF THE PRINCE'S FUND.

Of course, annual subscriptions, and the interest received from accumulated funds, &c., are wholly swallowed up by the annual expenditure of the Hospital, and, therefore, unless we can get an income from legacies and donations, and from sources such as these, we cannot afford to enter upon schemes of reconstruction and the building of a Convalescent Home. I wish to go into this matter somewhat a little carefully, and explain why we think our donations are falling off—at least, why we are apprehensive that they are falling off. Dr. Phillips mentioned that the Prince of Wales' Fund Committee had commented to us upon the state of repair of some of our buildings. Well, we make no complaint of that whatever. We know that they are not thoroughly up to date. We have, as the subscribers know, begun a scheme of reconstruction which we are only too anxious to carry on and are well progressing towards realising that object because, down to the year 1896, the average of our donations for the 11 years before 1897 was £2,738. In some years they were larger and in other smaller, but apart from one or two larger donations in special years, the average for those years reached £2,300. That was a steady income which we received from donations, sometimes more one year, sometimes less, but taking one year with another, we could practically count on £2,300 or £2,400 from that source. During the last three years, 1897, 1898, 1899, the average of our donations has fallen to £1,811. The year before

last we had one large special donation of £500. Taking that off, the average for the last three years has not exceeded £1,600, so that as between the period before the establishment of the Prince of Wales' Fund, and the period subsequent to it, we have had an average drop of some £700 or £800 in the donations. I make no complaint of this; I should be the last person to wish to be thought to be attacking the management of the Prince's Fund, because I am perfectly certain it does a great deal of good, and I cordially desire to see the benevolence to our London hospitals systematised; and if by this means we can manage to get them more systematically brought under the notice of the contributing public, no one would be more thankful than the Committee of this Hospital. While we do not wish to make the slightest complaint or attack, I do think that we are entitled to note the fact to our subscribers and donors that in the years before the establishment of this Central Fund we got such and such a sum from donations, and in the years since the establishment of that Fund, we have got such and such a less sum from donations. Of course we have been getting something out of the Fund. The aggregate amount for the three years has been £1,075; but even so, if it had not been established, we should have been about £1,000 richer on those three years than we are at the present time. When that is the state of affairs, and when at the same time the Prince's Fund Committee ask us to reconstruct we can answer with perfect good humour—and I hope the Committee of the Hospital will agree to make such an answer to the Prince's committee—we are only too delighted to accept your view and reconstruct; but we think, with the case that we can make out, you ought to enable us to do so.

Hospital is managed. Some people have members of their families treated who might pay, and ought to pay, and who can well afford to pay, a great deal more for the benefits that we confer upon them than they do pay. I am far from bringing a general railing accusation against my fellow-citizens. Many of those whom we take in treat us with great generosity and with perfect fairness, but we are particularly liable, owing to the nature of the Hospital, to be sponged upon by less worthy persons. When a case of infectious disease, say diphtheria or scarlet fever, is presented to us at the door, and we have room for it, we cannot turn it away because we are apprehensive of not getting a good subscription from the person who is responsible. If we were to enter upon such a course of policy it would not only be wrong in itself, but it would be one which would be universally condemned. I could not myself advocate it, and I am certain it would do harm to the community, because there would be the risk of the unfortunate individual being carted about with the infection upon him, and that is not a course of action which I would advocate for one moment. (Hear, hear.) But to use a colloquialism, that is the tight place in which we are put, and I think there ought to be a higher sense of honour upon those to whose rescue we come in their time of difficulty, and they ought not to take advantage of the fact, knowing that we cannot hale them before the law and demand a subscription. I do think, if this matter was properly and fairly represented to some of those who, having made great promises in some cases and not fulfilled them, that their sense of fair dealing and propriety ought to lead them to give us a larger sum than sometimes we have received. Chairman's Speech at the Annual Meeting, held at the Hotel Victoria,  
Northumberland Avenue, on Friday, 19th February, 1897.

## LORD BALFOUR OF BURLEIGH, PRESIDING

THE CHAIRMAN: Gentlemen, in accordance with usual custom, I rise for the purpose of moving approval of the proceedings of the committee during the past year, and that a vote of thanks be tendered to them for their services. The information as to finance and management given in the statement which has been read by Mr. Hamer, and by the medical report, which has been read by Dr. Phillips, is in both cases so full that I really don't think there is anything that it is possible for me to add. At any rate, nothing occurs to me which is not covered by these reports, so far as the statement of bare facts are concerned. I should like, however, briefly to dwell upon one or two of the facts from the record of work which has been put before us. As has been said, we have treated 874 patients during the past year, and it is interesting to know that of these 135 were servants of governors, or employes of firms, clubs, or hotels, who paid a subscription as governors according to our scale, and therefore were entitled to free treatment for their servants. The remaining 739 paid fees amounting to about one-fourth of the cost incurred in treating them. Some of them—a small minority—those who were treated as private patients paid the whole of their cost, but the others paid fees, some more or some less, according to their means. There have been some cases in which the whole of the cost has been excused to the patients by a special vote of the committee, upon the special recommendation of the house committee, but I think it is worth noting that in these cases where the patients are able to pay, the hospital should get something toward the cost of their treatment, and there is no doubt that in the case of those who were treated and who paid the whole cost to the Hospital, it was a much less cost to them as individuals than it possibly could have been if treated in their own homes. Therefore it seems to me that in every way the system upon which this Hospital is managed confers a benefit both on those who pay the whole cost of their treatment, and certainly on those who are not able to pay anything like the whole cost. But beyond and above that it confers a benefit upon the whole community by removing from amongst us so many centres of possible sources of infection and disease. The average length of time each patient stayed in the Hospital was  $47\frac{1}{2}$  days. It is satisfactory to note that the deaths from scarlet fever in the Institution were only 1·3 per cent.—the second lowest percentage which, I think, the Hospital has ever been able to show. It never goes very high—as the report says it is between 2 and 3 per cent., but in one year—about five years ago—I believe it was got down to a decimal fraction less than last year. We may, perhaps, compare it as a general sort of test with the deaths from scarlet fever in London outside hospitals. They reached an average of 3·6 per cent. I don't wish to press that too far, because, of course, the people who are treated outside our Hospital may belong to a class of the community that may be as good or better than the class of patients we get, or they may be much worse; but I am entitled to put this amount of stress on it that if in a Hospital where a great number of patients are congregated together we can reduce the death rate to a lower amount than those who are treated in their own homes without the risk of congregating together, we have shown that the Hospital is managed in an enlightened and proper way. I think I have shown that those who use the Hospital get great benefit, and I am, I think, entitled to make an appeal to those who have not hitherto subscribed, to help us in our work, and by doing so secure a right for themselves and servants and members of their family to a bed in the Hospital in time of need, when possibly, if there was an epidemic of scarlet fever or diphtheria in London, it might be very difficult to get proper accommodation in any other building. It has often been quoted before, but I should like again to refer to the words which the Prince of Wales

used when he presided at the dinner a few years ago. His Royal Highness said "that if on the principle of provident insurance every householder in London gave only a small subscription to the funds of the Institution, it would suffice for present requirements and enable the committee to build fresh wards, which were a pressing necessity." Mr. Hamer has told you that our funds are at the present time just sufficient for our annual expenditure, and he also said that we have made heavy drains upon our small reserve that has been laid by for our re-building, which, even at the time the Prince of Wales spoke, was in contemplation, and which has now been carried partially into effect. We have spent nearly £20,000 upon re-building the Hospital—£10,000 the year before last and £10,000 last year—and we should like to spend at least as much to still further re-build the wards which are not up to date; but whether we can do that in the near future or not, and whether we can build our Convalescent Home, that has now been before us for some years, must depend upon the amount of support we receive from the public. As you will have noticed from the report, we last year had to reject, with great regret, 184 patients who were tendered to us. We believe that if we could complete the re-building of the Hospital, and if we could see our Convalescent Home finished, we should be able to meet all reasonable demands from the class who use our Hospital. That are likely to be made upon us, and therefore we are very anxious, having begun this work of re-building, to get on with it as speedily as possible. And as the re-building will diminish the space available for patients, we are most anxious that at the same time we should be able to build our Convalescent Home. We are face to face with a somewhat difficult situation, and that is that as far as the present year is concerned (1897) we are at the present time £700 worse off than we were at the same date last year. Mr. Hamer has indicated the difficulties which the Secretary will have to meet in obtaining subscriptions this year. I am certain that this drop is not due to any decrease in the popularity of the Hospital. We have not had a single complaint, and therefore it must be some other cause; and I think I am not far wrong in conjecturing that it is due to the special fund which has been raised to help the hospitals generally. I should be very sorry indeed if one word was said which would reflect upon the move of those who started these Funds. I believe that the Prince of Wales's Fund has been most judiciously thought out, and that if properly taken up it is calculated to do an immense amount of good in stimulating public interest in hospitals, and to place them generally on a firmer financial footing, and therefore I wish to say everything I can in support of it. But I do wish to point out to those who are old friends and subscribers to this Hospital that they simply transfer the amount which they have hitherto given to us and give it to the Prince of Wales's or any other Fund, they are not doing any real good to the hospitals generally, and they are doing us a very considerable amount of harm. Of course, we shall no doubt get a fair share of the Prince of Wales's Fund, but if that is to do us any good, and if the Fund is to do good to the hospitals generally in London, it must be something in excess of what has been given in the past and not a mere substitution for what was given to individual hospitals. However, the year is still young, and there is plenty of time to repair this deficiency, but the position in which we find ourselves at the present moment is causing us a certain amount of anxiety. I hope that what I have said in respect of these Funds is not calculated to give offence to any body, and it is not meant as more than a friendly warning which I have reason to believe is needed in the interests of other hospitals as well as our own. I conclude by proposing the motion.

R/79
